COX CARES ACT SOLUTIONS FOR EDUCATION POWERS MORE ONLINE LEARNING, COLLABORATING, & FUN WITH DATA PLAN

ADEN

MAX

MOLLY

HARPER

A+ accessibility

Max, Harper, Molly and Aden can simultaneously do each of these activities in a month and still have bandwidth leftover to surf online on the weekend.

Virtual learning requires data for all sorts of activities, and the monthly data usage plan included with Cox internet provides A+ accessibility.

Here's a realistic example of all the learn-from-home activities a student can do with 1.25 TB in just one month – which is less than one-quarter of the available data:

45 hours for online tutorials and study aids

45 hours of internet browsing, researching for class assignments

67.5 hours for live synchronous learning

22.5 hours of online collaboration

45 hours for online study groups

22.5 hours for online gaming (don't tell Mom!)

135 hours for streaming music while working on homework

For more information about CARES Starter, CARES Essential or Connect2Compete programs – and the affordable data usage plans these packages provide – visit **cox.com/caresact**.
