CARES | Starter, Essential and Connect2Compete

ALLOW STUDENTS TO
UP, UP, UPLOAD AWAY!

Since successful virtual schooling requires connectivity for all kinds of activities, **CARES Starter**, **CARES Essential** and **Connect2Compete** have students and their families covered.

3 MBPS

With upload speeds of 3Mbps, these options provide plenty of internet capacity for more than one student to simultaneously learn from home.

In fact, multiple students under the same roof can participate in a virtual classroom setting, with additional upload capacity for regular internet activities to spare.

Cox CARES Starter, Essential, and Connect2Compete upload speeds allow students to:

15 × 24

1
Take photos of math homework (showing your work is key!) and upload it for grading

2
Use a digital platform like Google Meet or Microsoft Teams to collaborate with classmates on a history project

3
Email large files that accompany a research paper

4
Upload a video to showcase your reading and conversational Spanish skills

Even when all these activities are going on, students can still do other things like browsing the internet for homework research, streaming music or just chatting with friends.

Find out if you qualify for CARES Starter, Essential or C2C by visiting **cox.com/caresact**
